ABOUT ME

A recent Computing Systems graduate with a passion for technology and proven leadership experience. While pursuing my BSc, I successfully balanced my academic commitments with a role as a Duty Manager in hospitality, developing a unique blend of technical and interpersonal skills. Proficient in full-stack development using Python, JavaScript, React, Angular, and MongoDB, I combine my technical expertise with strong business acumen gained from managing teams and operations in a fast-paced environment. My dual background has honed my ability to translate complex technical concepts into clear solutions while effectively managing stakeholder relationships. I excel in team leadership, risk management, and creating efficient systems that drive business success.

STRENGTHS AND EXPERTISE

Python Programming	Social Media Management	Team Leadership
Web Development	Video Editing	Communication
Embedded Technologies	Content Creation	Operations Management

PERSONAL EXPERIENCES

At Ulster University As a BSc Student   **Jan 2022 - 2024**

Car Rental Web Project

I initiated and worked on few different projects whilst I was an University Student. Web Development Projects I worked on was on a car rental company that when locally hosted and launched was able to let customer signup, browse through the site and be able to book a ride with all the modern design framework been used.

Car Garage Database Systems

I made a database system designed to be a industry database systems which can store data in an organised manner where the host or the owner of the business can gather and channel the their leads for their day to day operations.

Event Management Systems

I also developed an Event management system that is potentially could be used for Vast crowd events. I utilized lots of sectors including : React.js, HTML , JavaScript , Python , RaspberryPi for external Devices and Sensors then Mongo DB for Database.

Emotion Detection System

I also built this fun system whilst my University days under Edge and Embedded Technologies. I made a system named EmotionQ that could potentially be used for different purposes major targeting entertainment sector. So this was able to understand and read a person's emotion based on his face and give a quote to motivate that person. Now this could be used in a Pub, library, fast food tilizing its idea and promoting their products with this fun system.

Pot-hole Tracking App Developmet

I also worked in a group project and this was a smartphone app development aiming to get the app to be able to detect the pot-hole with the people collaboration with their day to day life. We made this group consisting of 5 guys and treated this like a full industry gig and organised all the professional practices such as Sprints, SDLCs , Requirement Engineering, Use Cases studies, UI/UX studies and many more. Majorly I was working on User Used Cases, Requirement Analysis and Engineering.

WORK EXPERIENCES

Alongside my University since 2022, Majority of time I spent on part time job were into Hospitality industry. I worked couple of months in different companies until I came across Greene King. I joined Greene King around April 2022. Since then I haven't changed my job as my goal of improving my English Communication, Team Leading, Sales Skills that I wanted to develop were met there.

The Bunch of Grapes -Greene King
This is a beautiful English pub in Brompton Road Knightsbridge. I work here since 2022 as a **Duty Manager.**

Duties Involved in the Job:
